RECOMMENDED USES

Commercial

Residential

Interior Wall

Exterior Cladding

Fireplaces

Shower Walls

Steam Showers

Pool & Spa

The Umi Series is an Italian glazed tile in a variety of earthy natural colors including the watery Acero blue and deep Forest green. This material features a high-glossy, reactive glaze which adds further depth and character to the series. Intended to mimic an efflorescent, blossoming effect which presents inherent irregularities and slight indentations from piece to piece, as well as an uneven surface. Because this material is a porcelain product, minimal maintenance is required. This series is suitable for residential and commercial applications.

There can be noticeable variances between pieces, so it is important and recommended that a range of this product be viewed before finalizing a purchase. Piece to piece variation in shade or color are inherent in all fired clay products; therefore, it is recommended to mix tiles from several boxes at a time during installation to achieve the best range of color. When mixing sizes within a series: shade, texture and calibration differences should be expected.

Umi Osso Glossy & Umi Carbo Glossy

For packaging information, please contact your local Arizona Tile.

DCOF rating is a measurement of a tile's frictional resistance. It is the specifier's responsibility to ensure the chosen tile is appropriate for each interior and exterior application.

Please view actual material when making your selection, as the images on this page are only representative.
