

Combed 12 × 24

Combed 12 × 24

PRODUCT TYPE

Limestone

ORIGIN

Turkey

STOCKED FINISH

Combed

STOCKED SIZE

12 × 24

RECOMMENDED USES

Commercial (vertical only)

Residential

Interior Wall

Exterior Cladding

Classic Limestone Combed is quarried in Finike, Turkey which is a city on the coast of the Mediterranean in South Turkey. It is very dense, making it suitable for interior and exterior applications. This is a sedimentary stone that is formed in shallow seas and is composed mainly of calcite calcium carbonate. One of the unique characteristics of this limestone is the existence of some small shells and fossils that may appear throughout the tile. The combed surface of this product gives it a unique look and feel. It is great for feature walls, around fireplaces, and on commercial walls. There can be noticeable variances between pieces, so it is important and recommended that a range of this product be viewed before finalizing a purchase.

Piece to piece variation in shade or color are inherent in all natural stone products; therefore, when installing natural stone tile, it is recommended to mix tiles from several boxes at a time during installation to achieve the best range of color. As a natural stone product, it is recommended that it be sealed to extend its longevity. It is not recommended to grout this product.
