

### PRODUCT TYPE

Limestone

### ORIGIN

Turkey

### STOCKED FINISHES

Brushed

Honed

### STOCKED SIZES

12 x 24 x 3/8 Brushed

12 x 24 x 3/8 Honed

18 x 18 x 3/8 Honed

3/4" (2cm slab) Honed

### RECOMMENDED USES

Commercial (vertical only)

Residential

Interior Floor

Exterior Floor

Interior Wall

Exterior Cladding

Fireplaces

\*Shower Walls

\*When installed in interior wet areas, the product must be sealed and maintained properly. If it is not, the appearance of the product could be altered. Please contact your installer or sales representative for more information.

Classic Limestone is quarried in Finike, Turkey which is a city on the coast of the Mediterranean in South Turkey. It is very dense, making it suitable for interior and exterior applications. This is a sedimentary stone that is formed in shallow seas and is composed mainly of calcite calcium carbonate. One of the unique characteristics of this limestone is the existence of some small shells and fossils that may appear throughout the tile. It is possible to have fill and small pin holes in this product. It is a natural characteristic of the stone. It is recommended to clean and seal the stone after installation. There can be noticeable variances between pieces, so it is important and recommended that a range of this product be viewed before finalizing a purchase. Piece to piece variation in shade or color are inherent in all natural stone products; therefore, when installing natural stone tile, it is recommended to mix tiles from several boxes at a time during installation to achieve the best range of color. As a natural stone product, it is recommended that it be sealed to extend its longevity.
