RECYCLED CONTENT**

The 3D Series is a rectified white body ceramic wall tile, offered in 4 multi-dimensional styles and a flat field tile. This series is suitable for residential and commercial vertical applications.

For proper bonding, LFT/LHT mortar for large format and heavy tiles should be used when installing tiles with a dimensional length greater than 15 inches, and rectangular shape and plank tile, per industry standards. Proper thinset coverage is also necessary, and in some cases, back buttering of the tile may be required.

To get full effect of the 3D pattern, it is recommended to set the tile with a straight joint as shown in the diagram.

When installing 3D White Matte with a staggered joint, it is recommended that the offset should not exceed 33%, unless otherwise specified by the manufacturer.
