The Castle Brick Series offers five colors with beautiful variety. A coordinating corner piece provides increased flexibility for design applications. Because this material is a porcelain product, minimal maintenance is required.

There can be noticeable variances between pieces, so it is important and recommended that a range of this product be viewed before finalizing a purchase. Additionally, texture and calibration differences should be expected.

Piece to piece variation in shade or color are inherent in all fire clay products; therefore it is recommended to mix tiles from several boxes at a time during installation to achieve the best range of color. This series is suitable for residential and commercial applications.
