12 x 24

STOCKED TRIM

3 x 12 SBN

RECOMMENDED USES

Commercial
Residential
Interior Floor
Interior Wall
Exterior Cladding
Fireplaces
Shower Walls
Steam Showers
Pool & Spa

P.E.I. RATING: 4

FROSTPROOF: Yes

Cala is a rectified porcelain that is produced to emulate natural marble. Because this material is a porcelain product, minimal maintenance is required. To achieve the best range of veining, it is recommended to mix tiles from several boxes at a time during installation. When mixing sizes within a series, shade, texture and calibration differences should be expected. This series is suitable for residential and commercial applications.

Grout release is recommended for this series, prior to grouting so grout powders do not fill pores in the tile surface, which can attract dirt when walked upon. It is recommended to use a coordinating grout color for all polished porcelain, contrasting grout colors are not recommended. For proper bonding, LFT/LHT mortar for large format and heavy tiles should be used when installing tiles with a dimensional length greater than 15 inches, and rectangular shape and plank tile, per industry standards. Proper thinset coverage is also necessary, and in some cases, back buttering of tile may be required.

When installing rectangular or square tiles 15 inches or longer with a staggered joint, it is recommended that the offset should not exceed 33%, unless otherwise specified by the manufacturer.
