## MADE IN ITALY

### PRODUCT TYPE

Rectified Glazed Porcelain  
Digital Print Technology

### STOCKED COLORS

Tru Marmi Arabescato  
Tru Marmi Extra  
Tru Marmi Gold  
Tru Marmi Silver  
Tru Marmi Venatino

### STOCKED FINISHES

Matte (M)  
Polished (P)

### STOCKED SIZES

12 x 24 (M & P)  
24 x 48 (M & P)  
4 Inch Hex Mesh (M)  
2 x 2 Mosaic Mesh (M)

### RECOMMENDED USES

Commercial  
Residential  
Interior Floor  
Interior Wall  
Exterior Cladding  
Fireplaces  
Shower Walls  
\*Shower Floors  
Steam Showers  
Pool & Spa  
\*2 x 2 Matte Mosaic Mesh and  
4 Inch Hex Mesh Only

### STOCKED TRIM

1/2 x 11-5/8 Pencil Bullnose (M & P)  
3 x 12 Surface Bullnose (M & P)

### SPECIAL ORDER

Special Order Sizes, Colors and Finishes  
Available: Please contact your Sales  
Representative for more details.

**D.C.O.F. WET:** ≥0.42 (matte)

**P.E.I. RATING:** 4

**FROSTPROOF:** Yes

The Tru Marmi Series is a rectified glazed porcelain. Digital print technology creates some of the same characteristics as some of the most sought-after natural stones, including marble. Because this material is a porcelain product, maintenance risks involved with actual stone are eliminated. There will be noticeable variations in color and movement between pieces. Therefore, it is important and recommended that a range of this product be viewed before finalizing a purchase.

Piece to piece variation in shade or color are inherent in all fired clay products; therefore, it is recommended to mix tiles from several boxes at a time during installation to achieve the best range of color. This series is suitable for residential and commercial applications.

Grout release is recommended for the polished finish, prior to grouting so grout powders do not fill pores in the tile surface, which can attract dirt when walked upon. It is recommended to use a coordinating grout color for all polished porcelain, contrasting grout colors are not recommended. For proper bonding, LHT/LFT mortar for large format and heavy tiles should be used when installing tiles with a dimensional length greater than 15 inches and rectangular shape and plank tile, per industry standards. Proper thinset coverage is also necessary, and in some cases, back buttering of tile may be required.

When installing rectangular or square tiles 15 inches or longer with a staggered joint, it is recommended that the offset should not exceed 33%, unless otherwise specified by the manufacturer.

For packaging information, please contact your local Arizona Tile.

*DCOF rating is a measurement of a tile's frictional resistance. It is the specifier's responsibility to ensure the chosen tile is appropriate for each interior and exterior application.*

Please view actual material when making your selection, as the images on this page are only representative.
